

- There will be 2 normal rounds. After that there will be one final round.
- The first round will consist of 30 short MCQs. Among these 30 questions 7 questions will be highly challenging. Person who does all of these 7 questions will be awarded 500 rupees. Person who does the maximum number of these 7 questions will get wild card entry to the final round. After the first round, top 30 participants will be selected for second round.
- The second round will contain MCQs as well as integer type questions, puzzle type questions and many more types of questions. Top 5 contestants will be selected after the end of the second round.
- The third round will be the final round. Top 3 contestants will be selected as winners. Rules for the Final round will be given to you in the final round.
- Be ready to become mathaholic.
- In case of any problem the decision of the coordinators would be final.
